

CS 402 – Fall 2005  
Assignment 5

Design a menu driven program of your choice that allows users to interact with the program by making selections from the menu.

Some possibilities: Allow the user to construct a robot using parts that you provide.

Allow the user to put a picture together with parts you provide and write text labels on various parts.

Combine animation and a menu by allowing a user to select objects and move them around on the screen to create a collage.

Allow a user to design a room by setting up furniture objects and allowing the user to move the furniture around to see what it looks like.
