

C.S. 112: Quiz 0
Due: August 28, 2015

Name: _____

The syllabus is a contract between professor and students. It explains your rights, lays out the rules, and gives you information on how best to achieve the course goals. Like any contract, it must be read carefully and referenced frequently to answer questions. This take-home quiz will highlight some important parts of the syllabus, give you a chance to visualize scenarios involving the honor code, and will give you a free quiz grade to get your average started off right.

1. On which dates are the exams?

Please circle this sentence after you've marked the exams in your calendar.

2. About how much time outside of class should you expect to spend on computer science each week?

3. Are you supposed to read the book before class or after class?

Please circle this sentence after you've obtained the textbook

4. What's the "best" way to read the textbook, according to the syllabus?

5. What are reflection questions and what are you supposed to do when you find them?

Please circle after you've obtained a notebook or binder just for CS 112.

6. Suppose you talk to a tutor about a homework problem and after you're both stumped for a while she realizes how to do it and types code on your computer. You then rewrite this code in your own words and hand it in. Have you violated the honor code? Why or why not?
7. You and a partner work on homework together. You look examples up in the book, type in code from the book on his machine to see how it works, and then solve the problem on paper by writing the algorithm and pseudocode. Before leaving you throw the paper away then go home and quickly write the code to solve the problem. Have either of you violated the honor code? Why or why not?
